IndEx (Industry Exposure)

Programs which focus on giving earlier industry exposure and awareness to the students in the first year of studies in order to meet the industry expectations and become industry relevant graduate once graduated from the university.

The objective of IndEx are as following:
1. To provide a better understanding of the potential job opportunities available in the market.
2. To build self-confidence among students to be successful in their future career direction.
3. To give exposure about the real working environment and clear about the opportunities available in the industry.
4. To build the talent pool of professional engineer that meet industry requirements.
